

Question 2 Have you experienced technical issues when setting up / using Google Classroom?	Question 3 Have you raised the technical issue with school and received support from a member of staff?	Question 4 How long, on average, does your child spend each day on home learning?	Question 5 Please indicate what your child engages with during home learning.	Question 6 What does your child find most useful on Google Classroom?	Question 7 How do you submit work onto Google Classroom?	Question 8 Does your child engage with the personalised feedback given daily to help them progress in their learning?	Question 9 This lockdown, we have introduced pre-recorded videos to assist with explanation of learning. How have you found these? Have they helped?	Question 10 What would you like to see in addition to what we are currently providing?	Question 11 Please feel free to make a general comment regarding the school's current provision and support
						As the parent I do utilise it.	Yes the videos are brilliant and really help.		
							The videos have been brilliant which helps my child engage better	More videos would be greatly received.	I'm pleased with the current support. Thank you
		In school so only home google classroom use when ill			Depends on if easy and obvious if correct - if need help/response send in work otherwise just mark as done		Brilliant		
					Take a photo or video of the work	Yeah he gets very excited	■■■■ prefers these and really likes seeing Miss Kelly		
		Split into morning and afternoon					These videos have helped with home learning		
			It takes us quite a long time to do the work as he is easily distracted so we keep coming back to it.	He likes the videos for phonics but enjoys the activity sheets as he can do them on the ipad and likes changing the colours.	Does this mean hand in??	He loves getting messages back.	These have been very helpful.		
						Yea, he loves the feedback			Everyone is doing such an amazing job, thank you
							Brilliant		
			All work				Very helpful		
Difficult to sign on and download and print attachments						Yes very much	Amazing. ■■■■ phonics and maths video are so so helpful and very engaging!!		
							Yes they are fantastic and my daughter loves them		
							Very good		
			■■■■ seems to be fine with areas		I attach all work completed		These have been brilliant	Everything seems fine but I di fund the videos very helpful	
				The pre-recorded videos are really good although ■■■■ struggles to concentrate. She really enjoys the class stream also, seeing her friends.		Yes, the comments boost her confidence	These have really helped, as otherwise ■■■■ needs me constantly.	Online zoom lessons	
		Usually 3 hours spread out over the day. Sometimes a bit more.	He engages with English, maths and phonics	He likes watching the videos which makes him feel more likes he's in a lesson and	And make comments about how he has been learning.	I tell him what Miss Kelly has said and he likes to try his best to do the best work he can to send to miss Kelly.	The pre-recorded videos are really helpful and help with his learning. Helps me understand what how to help teach him too.		The school and ■■■■ is doing a really great job in really hard times! And everyone has been so supportive. Provide

				helps to learn from the teacher.					plenty of work to do and not putting too much pressure on. Miss Kelly is doing a fantastic job to try and keep the children engaged in learning and also keep them talking with their friends through the stream. I have felt really supported as well by both [redacted] and [redacted]. Thank you for your all your doing.
						Yes	Useful start to the learning period - gets him focussed.		
Getting google classrooms set up was extremely difficult, I gave up in tears and [redacted] took over. Fortunately he managed to log both children into separate ipads and into separate browsers on his laptop. We are fortunate that we have all these devices at home - I'm not sure how families are coping without them		We are both working and are starting home schooling as early as we can to try and get as much done in that pre-work timeslot as we can. If the children won't engage / cooperate in that time slot, we don't hand anything in that day as there isn't another opportunity to try again. I appreciate that every families circumstances are different but we are really struggling with two children who need 1-2-1 attention / support with home schooling and two jobs.		I just asked [redacted] if he doesn't like google classrooms, he likes going to school and doing stuff there.		We read it out to them, but frankly it is more motivational for us than the children!	Very much so, I think [redacted] blue peter style videos are brilliant!	Live lessons for small groups? Though we may struggle to join, depending on when they are scheduled in during the day.	We are very pleased with the provision this lockdown, we have had more feedback and phone calls in the last two weeks than we had in the whole of the previous home schooling lockdown. Google classrooms is set up well, with clear daily structure and plenty of resources. Our family problem is that we cannot achieve everything everyday due to both of us working and some days if neither child cooperates we do not achieve anything. This lockdown is much harder for living in general.
						When we see it, he likes to hear the positive feedback.	[redacted] has enjoyed [redacted] phonics lessons. It enables him to work more independently.		
						Yes [redacted] works well on personal praise from myself and teachers		I think what you are currently doing is working and its brilliant (:	I think the teachers and all the staff at the school are doing a fantastic job, google classroom is brilliant and as a parent i also feel like I'm learning subjects with my child that I haven't done in years! So thank you all (:
On my phone i have had to set up as a work profile. Took a while to work that out.			She engages with all of this when she is in the right mind set. (Could only tick one box)			Yes, this is very motivational for her (and me !)	Brilliant!	I think the level of what you provide is great. I would NOT want live lessons. These wouldn't fit in with our world. Perhaps recognition of the kids birthdays on the stream like they would at school?	

There was one video we couldn't view but generally been great				He cracks on with all the activities and enjoys them			Yep def the phonics lessons have been amazing - thank you I know it must take a lot of time to do	Live zoom lessons?	
				We also enjoy the class stream, links to online learning games and feedback			Yes absolutely	Possibly an online lesson or just an online session a few times a week so that the teacher and class can engage with each other. I think it would be a big morale booster	
			■■■■ loves the pre-recorded lessons and engages really well with these.		We take photos and write a comment about what ■■■■ has achieved or struggled with that day	■■■■ has personalised feedback on the days she has been in school, as well as her home learning days. we find this really useful when continuing the learning at home as we know what may have been difficult for her and we would make an effort to practice these areas at home. We always ask ■■■■ to read the feedback from teachers as this helps encourage her and supports the link between home and school. She finds it motivating knowing that a teacher looks at her work from home.	Pre-recorded videos are amazing!! ■■■■ engages with them so much better than us trying to teach. It really helps as they are learning in a very similar way to what they would at school which we are finding really helps her to retain information. Sometimes we also don't know how to "teach" a certain subject/topic but the videos are great for this learning.	A couple of live lessons to give the children opportunity to be see and learn together would be lovely. If not possible more pre recorded lessons would be amazing!	Just a very big thank you to all the staff at school, who are doing a fantastic job in a very challenging time. As a family we want you to know we really appreciate all the extra work you are having to put in at the moment.
	Brilliant support offered if needed		All except topic			Yes but not always immediately	Yes they have been really really useful	Nothing, its been really great! Thanks for all of your hard work!	Thank you!!
			He engaged so well with the pre recorded lesson from ■■■■ more of them would be great			Yes, he likes to hear the teachers comments	Amazing		
						It is always reviewed and i think he likes to know how is doing.	Definitely!!! Its helps ensure the tasks are explained correctly and in a style familiar to the children	For kS1 I think all is well balanced	I think you are all doing a really wonderful job!! Thanks for all of the hard work and effort it is really appreciated
				Feedback Differentiated tasks Videos		Yes she always wants to know and see what ■■■■ has written - it's a real motivator	Really helpful. ■■■■ says she likes seeing and hearing ■■■■ and I think it helps them feel part of the class	Some more specific feedback on work - next steps	We really appreciate all the effort that goes into providing the online learning each day. ■■■■ enjoys the activities and looks forward to stories etc being posted on the stream. A big thank you to you all!
						It's much more tricky, now all the work is all together for the day, to have meaningful feedback for a particular subject. It is usually just a general comment which doesn't feel	My child loves seeing their teacher- it definitely engages them	We would love a live google meet once or twice a week where they could see that other children are also at home doing their learning and feel connected to their classmates.	I do think it's more tricky now to unpick which attachments belong with which lesson/activity especially for those who don't know about the curriculum. It can feel

						meaningful in terms of progressing learning.			overwhelming when you open the day and there is so much attached, as a parent of a KS1 child you have to spend some time working it out before then working with your child. I appreciate this might be quicker/easier for the teachers but it does create another barrier for parents. Thanks for all you are all doing- i know its a tough time and juggling everything is tricky
							Yes they definitely hold my daughters attention	Maybe a live session if possible	Great as always
Problem with google classroom app. As [REDACTED] has a personal google account used on her tablet, we were unable to set up a separate account for her to use the app. We use google classroom through a browser instead.	Felt that school may be unable to help/had more important things to be worrying about! We googled a lot and tried lots of different ways to get it to work..		Felt that school may be unable to help/had more important things to be worrying about! We googled a lot and tried lots of different ways to get it to work..	We love the videos from [REDACTED]. For phonics, and stories and updates. Helps [REDACTED] feel connected.		Yes. We read it to her/she reads it.	Brilliant. A real help. Especially as [REDACTED] will sit and be engaged well with them.		
							These are brilliant the learning feels more personalised!		
	Received a phone call from [REDACTED] very promptly after sending an email.	Depends on the day and the activities set, some days we do 3+ hours.		All of the above are useful and a good mix of these strategies ensures that my child is kept engaged with her learning and also feels part of the school community.		Yes we read it each morning before we start the new tasks.	Very helpful, also means that my child is more independent when completing the majority of activities	Maybe a check in session once in a while where the children can come together? Having said that though the current provision is working for us and my child is happy with the learning that is being set	We would once again like to say thank you for the provision and support you are offering. Things have run very smoothly in terms of home learning and you have built upon the successful provision last year.
							Brilliant		
						No as it's on the previous day [REDACTED] will only see the comments if I tell her about them.	Yes the videos of her teachers are the ones [REDACTED] enjoys the most. She really likes the videos of [REDACTED] reading	A live lesson. [REDACTED] is really missing her friends and teachers so one a day will help focus her and allow her to hear and see the class as she would at the start of a school day.	Thank you for your hard work and support we know It's just as much of a nightmare for the teachers too.
						Sometimes. I find it very useful though.	Very helpful. Also, they are great to keep that teacher and child relationship going.	Maybe some 'live' tutorials in small groups so that they can interact with teacher and friends.	
						Yes. She really enjoys getting it.	These have really helped me to understand what she is doing too. She engages well with her own teachers sometimes she doesn't like the		

							videos with different teachers from other schools.		
Printing from mobile is not possible if you have more than one child. System signing out.		We find that 3 lessons are manageable with two working parents teaching two children. 4 and additional spelling and SPAG are hard to fit in. Live lessons would be good.				Yes we share this	Has helped as last time we had to teach a lot more	Live lessons	
							Yes that has helped [redacted] to engage more with learning		
						Yes	I think it's great, it's good for children to see their teacher		I think the school has handled things brilliantly. [redacted] has been at school and he's really enjoying it. We try to do some work at home but I often work late. [redacted] dad is a bit older and just doesn't 'get it'. Thank you for all you are doing
A phone call with [redacted] sorted this problem		Really hard to engage the children in home learning.							
Had been already set up in previous lockdown							Short teaching videos help my child to engage and feel connected to school. Does not feel so isolating at home by having the opportunity to see familiar adults. I can make sure I am using the same terminology as the teachers when talking about learning after watching their videos.	More story time, my child really looks forward to these!	Unable to access work via timetable on class stream as it automatically directs me to sign into a google account when using the app. (It takes me out of the app) Finding the work on the classwork tab works better for us.
			Can't choose more than one option for some reason but we have focussed on maths and English. The Oak Academy videos are very good, but take a lot of support and concentration, and one every day is probably a bit much, but 2 or 3 a week would be ideal. Guided reading / comprehension is so important - we are trying to keep up with these. Is The Tunnel a set text that they have to use? Considering how much amazing children's literature is						

			out there, it is incredibly dull!!						
				█████ can then work at an appropriate level for her		Yes, she looks forward to hearing what her teachers have said	█████ has enjoyed seeing her teachers and likes the games for the maths warm ups that ██████ has done		Everybody is working really hard and the range of activities is lovely for the children at home. Thank you!
				She enjoys being guided with her learning		Yes	These have been really useful and have helped keep my child engaged and to understand the tasks better	More mindfulness!	Thank you for supporting my child's learning, she thrives on routine and structure and the feedback from her teachers is really important and encouraging for her
I kept trying to log into my work email but was fixed using a different browser			All of them! She especially likes the maths	Video tutorials for explaining a task she can then do on paper		Yes, she likes reading the praise	Yes, ██████ likes seeing her teachers read stories and explain tasks. She also likes the maths warm up	I don't want live lessons but maybe a live short check-in every so often so that ██████ could see her classmates would help her feel less isolated.	It's enough! We don't want any more video content as this needs my work laptop. No live lessons please as wouldn't work, we need flexibility around our own work demands. The work currently provided is very good, thank you for all your hard work in putting it together!
I now just stay logged on as it is quite a fuss doing it from scratch		I find around the 3 hours and ██████ is losing interest but we do times tables when we're walking and read at bedtime too				Yes	Definitely a help. Plus he likes seeing the teachers	Some whole class live chats. I know other schools have a good morning Teams chat to say hello and interact with each other. ██████ is missing his class friends a lot. Even maybe something like wake up shake up but live!	I think you are all doing an amazing job in such horrendous situation. I'm proud of you all. I really am. As a working mum it is a complete juggling act and I know it must be the same for all of you. Stay safe and hopefully see you soon xx ██████
						Yes	Yes helpful	Its great thanks	Thank you for providing work and support
						Yes	They have been very helpful.		
						No	█████ likes them		
						Yes			
Only right at the start. Not recently	The office were a massive help :)					Yes, it definitely helps build his confidence, and boosts his morale.	Amazing. I said to ██████ today, the videos are very welcomed, it means our children get to see their teachers, they react well to a known teaching method	Honestly? I think you are all doing an amazing thing, so, nothing :)	Just thank you. The children always come first with you - as a school, and I think that shows in abundance with the work that is set, the encouragement that is given, and the support that is readily available.
							They have really helped and taken pressure of trying to explain the task		
						Feedback is limited although is received positively	They are good, white rose maths is helpful	Some live learning	Unfortunately, I feel Redfield Edge has gone from leading the pack to lagging behind. Most other schools seem to be offering a blend including some live lessons. I'm really

									disappointed we don't have this and am concerned that our son's development is being hampered as a result
		██████ is doing it completely independent as I'm at work and siblings have live lessons therefore it takes her longer to get the work done.	She makes sure she gets the maths, English and spellings done. She tries the guided reading but has no interest in the topic work.		She takes pictures of it all and submits it	I don't think she even looks at it	They've been helpful		I think you are all working really hard in difficult circumstances and we appreciate all you do. Its handy to have the weeks work all put on at the same time so I thank you
						Yes	It has helped and my child has enjoyed seeing her teacher.	A weekly assembly from Headmistress explaining what is happening with rest of classes and in general.	I feel my child is being supported well but we are lucky I am a furloughed parent who is able to concentrate on home schooling.
						Yes. The interaction from the teacher on the stream has also been good	Good. Movement closer to the screen to see	The virtual school assembly mentioned. The class doing more together like the upcoming school trip	Great provision from the start. There is enough to keep busy without being too much and the structure is flexible, so you don't have to panic about getting lots completed each day, if parents work circumstances don't allow it. ███████ feedback has been upbeat and encouraging.
						We read feedback. Usually just a well done or positive praise. Specific feedback with a next step sometimes would be useful	Yes. Helps with expectation and also to have contact with teacher even though only one sided he likes it	Class zoom registration 15 mins each morning would be ideal but once a week so they can see each other would be beneficial	Really good. Can choose tasks. Clearly lots of work has gone in to the offer. Big thanks to all staff
			You can only select one subject but Spelling, Maths, English, Topic occasionally and guided reading- although guided reading is hard and the resources are usually quite dry.			We only look at the feedback sometimes if we asked a question	They have been very useful although the power-point that has assisted hasn't always been as useful.	Stories read by class teacher on the stream, more interaction with guided reading and some support with spellings. My child struggles with spelling and isn't given much support in this.	The school have been fantastic and I feel blessed to have my child go to this school.
						Sometimes. She always like reading the feed back	Very helpful Would like them to be loaded the day before though if possible because we sometime do some of the work on the evening when we can sit together and assist if needed without distractions		Keep doing what you are doing! You all do amazing jobs and we really appreciate it. Thank you stay safe.
						Not really	Yes	More live assistance with maths	
	Yes brilliant support available					Yes	Very useful!!	Nothing, its been really great! Thanks for all of your hard work!	Thank you!
We weren't able to uploading homework. One	They solved the problem straight away					sometimes	Very helpful		Maybe some online lesson, like zoom meeting

day we couldn't access at all									
						Yes , ■■■ finds this very useful	Brilliant ... ■■■ really benefits from the videos and each video always brings a smile to her face !	We are happy with everything ■■■ is supplying , he is doing a fabulous job	The amount of work and videos from ■■■ has been great . He has been so supportive and ■■■ has really enjoyed the videos he has posted . The videos for each maths lesson have proved invaluable and have been a great addition to the learning.
						Yes	Yes these are very helpful by making the children at home feel part of the class	Some live lessons	I think you're all doing great, well done!!
			My daughter engages on all work on google classrooms						
		The level of work is causing issues trying to split time between both children.				yes	■■■ likes these videos but if there is an area where she doesn't understand there is no further explanation or help with learning/understanding.		School have been fab but i would like to know what happens if a child is in school and doesn't understand a question/subject. Are the teachers spending time explaining and going through it with them?
						Yes	■■■ likes the videos	■■■ would like more see work on different subjects, such as science	
						Yes she does. And if she is ever stuck, feels confident sending a private message to the teacher....I font know how confident she would feel putting it on the main class feed.	Really helpful!! To both the child, as it helps explain things in a manner they are familiar with but also us parents as it ensures the children are being instructed in the correct way.	Class meetings on zoom or teams maybe? Not necessarily for open discussion as I realise this could be tricky, more just so the class can see each other.	I think you are all doing a wonderful job!! The input, effort and time given to getting all of this in place is clearly evident and is really appreciated!! The children are engaging well and it's great to see thankyou!!
			■■■ loves the maths but also topic, English, reading. She likes the class stream as well.	But also feedback and differentiated tasks (in maths she likes the challenge of working through the tasks independently). X As a household we really appreciate the topic grid as it gives us a chance to pick the activity which suits at the time and follow A and T' interests. It also allows us to plan ahead.		Yes - ■■■ likes to read Mr Monks' comments - especially on her topic.	Yes, definitely. These have increased her independence in her work, she likes to start on her own watching the video and choosing her own tasks.	Possible occasional class live check in	Thank you for all your hard work
			And topic, English. He likes reading the chat.	The personalised feedback is also very important to ■■■ - especially when ■■■		Yes - it is really important to him. I think it makes him feel still connected and that his work has a reason to be done.	Definitely-■■■ seems more motivated with the instruction coming from his teacher!	An occasional whole class live check in would be wonderful although I appreciate these are difficult to arrange/manage	I would like to say a massive thank you for everything you are doing for the children. The amount of work and choices given are

				replies to something he has said.					just right and allow us to work around other pressures and daily mood! N We really appreciate all the hard work and long hours that go on behind the scenes.
						Yes	Yes		Live lessons would be great
						yes	Very helpful		
		As I'm still at work we has to do home learning all in the AM. And Fridays none is completed. I'm a keyworker. Yet when I asked if their was a space I was told no So my child is being looked after by his older sibling who is trying to do their own work live lessons.					They are really useful if I can get my child to concentrate and watch and not get distracted		
			enjoyed the video connection with his teacher. He doesn't like spellings usually but engaged die to the video was filed so he could follow along to hi teachers instructions.	Also the feedback and more paperless tasks. They find it difficult to engage when the sheets ate the same each day and no or little teacher led videos.		No as its from the previous day he does not look unless I point it out too him.	Yes he finds the teacher explaining the work much more beneficial and prefers them to the links to other videos.	I would like to see a live lesson a day. It will help them keep in contact with their teacher and see other members of the class. He is finding the engagement hard when completing sheets without having interaction.	The school have been good at keeping in touch and offering advice.
							A bit	Maybe online lessons	
						Yes likes this	has liked this.	Online zoom classes/learning	is still very easily distracted, I think an online lesson would help massively.
			's sibling has personalised feedback on the days she has been in school, we find this really useful when continuing the learning at home as we know what may have been difficult for her and we would make an effort to practice these areas at home.	Send in photos and comments about what tilly has done that day.		Yes, I always read the feedback to tilly as it gives her encouragement and keeps the link between home and school which i feel is important.	Pre-recorded videos are amazing!! engages with them so much better than us trying to teach. It really helps as they are learning in a very similar way to what they would at school which we are finding really helps her to retain information. Sometimes we also don't know how to "teach" a certain subject/topic but the videos are great for this learning.	A couple of live lessons to give the children opportunity to be see and learn together would be lovely. If not possible more pre recorded lessons would be amazing!	Just a very big thank you to all the staff at school, you are doing a fantastic job in a very challenging time. As a family we want you to know we really appreciate all the extra work you are having to put in at the moment.
				Teacher lessons are good and are very engaging. Open activities are good but tricky to set up and rub whilst working. There are little differentiated activities. X All lessons			When given	Very helpful	Live lessons

				are grouped into one day so minimal 'well done' feedback is given and is often not subject based or reflective of amount of effort we have made. Have feedback that we are ahead of current learning but we have to wait for the rest of the class to catch up since early December which is not allowing for progress to be made. Although my child is 'on track' this is not reflective of potential.					
			I can only click on one of the above but he engages with everything that [redacted] provides. He really seems to enjoy the video lessons such as the phonics and tricky words also the wiggly Wednesday and move it Monday videos seem to really get him in the right mood to start a day of school work. I think seeing [redacted] in screen helps remind him that it's his teachers setting the work not just mummy!		I send in a selection of pictures and video (if we have recorded any) and then write a private comment describing how he has got on with the work.	He does. I think it gives him a little boost at the end of the day that he's done a good job	They are fantastic! Really help remind [redacted] that it is a school day and he needs to complete the set work before playing. They help us feel connected to the school.	I can't think of anything at the moment	I feel the school are doing a fantastic job in a difficult time :)
			All of the above. [redacted] loves seeing other's photos and videos.	Interacting with people is really important at this stage of lockdown		Yes	Yes	A live stream lesson where the teacher can interact with the children	
					Upload images of the work, add private comments and then click submit.	I explain this to [redacted] but as she always seems pleased that she has received good feedback from her teachers.	Very helpful We only have phonics videos.		
						Yes we read to him every day the feedback	[redacted] finds these very helpful. He much prefers the videos	A zoom class would be really good and helpful and i think the children would really enjoy this even if it was	
								Children following a SEN plan be able to attend special lessons in a bubble	

								with their teachers in school ideally or one to one call via FaceTime or teams etc	
							Yes they definitely help with my daughters attention	Live videos if possible	Great as usual
						Yes. I read it to my child and she always enjoys hearing it			Absolutely, brilliant. Couldn't ask for anymore
						Yes i always tell him the positive comments he gets from the teacher. I can tell he's really proud when gets this.	100% amazing	I think what we get is enough, I would struggle to fit in anymore per day as have a little one to look after too	I appreciate all the support from ██████, she really is an excellent teacher. The work, videos she does, feedback given is honestly brilliant-just want to say thank you
							The pre-recorded lessons have really helped	I would appreciate paper copies of activities but appreciate it's probably not feasible	It's been really good
						Yes	Yes they are helpful, any teaching aid is a good thing!		
						Yes any feedback/ comments are well received	Yes so much better , making task easier to understand and much more engaging	Online lessons	We think all the teachers are doing a great job under very difficult circumstances
			Phonics, guided reading, spelling, maths, topic, English.	Topic grid, video tutorials, personalised feedback, which provides a confidence boost.		Yes	Excellent, very helpful		
			He prefers maths over the others			I read it out to him occasionally to encourage him	Yes, he liked working with his teacher, seeing her even in a video in a sense of normality	Happy with things as they are	Work load is reasonable and do able, good mix of things and is working for us
					I upload her work and submit along with some comments so it give her teacher some idea on how she got on with her work.	It does help feedback as she know what will help or where to improve	Yes they do help as it sets her off with a good start also it helps the parent to see how learning is taught so we can continue the same learning with them at home.	At the moment we are happy with what you are currently providing and it works well for us.	
						Yes	Yes		Great provision
						Yes, ██████ will read all feedback, it seems to give her the confidence she needs to know she is doing work correctly and her teacher is happy with what she has done.	Very useful	I think it works well as it is.	Great. ██████ and I feel supported well to continue her education as best as possible in the situation we are in.
			Engages with all. Form will only allow one option to be ticked.			Yes	The videos are great and the fact that they are delivered by the teachers means that my child's engagement is stronger and makes them still feel part if the school	I think remote live lessons would really help with learning and engagement	The daily personalised feedback is greatly appreciated
						Yes	Great	Lessons were the teacher is on video call with the class so they can engage. A few schools have been doing it And its had great feedback	

						Yes as long as I highlight it. I do this by sending pic to home or discussing. We also share achievements with grandparents for encouragement.	Really good. I appreciate the tremendous effort teacher is putting in. Being a youtuber surely was not in the job description but these videos are excellent and have really helped engage my son in learning. I have been able to play them as an intro and we re play to help trickier tasks.	A government funded pay rise for teachers and TAs they deserve it.	A carefully considered approach to home schooling achieved at short notice. Calls from teacher every week is so helpful. Understanding approach. So glad this is my son's school because I know he has the best chance in the worst of times. Thank you
						Yes	Outstanding addition. I am also mindful of the additional work this creates for teaching staff in addition to all other tasks so I would like to express my thanks for this.	I feel that the level of provision is the perfect balance, not too much and not too little. [redacted] does participate in mindfulness tasks but we do not document this. [redacted] is looking forward to The mental health week next week. As parents, we are pleased the school has decided to give mental health a focus next week as I feel this will have a significant benefit to [redacted]. We also undertake PE/fitness activities each week from Joe Wicks to a scooter ride or going for a walk but we do not document this on google classroom.	I would not like there to be any "live lesson" provision, as this would create additional stress for us as parents and for [redacted]. [redacted] said he likes the video tutorials as he can pause them, go back if he does not understand and go at his own pace. In addition, he said that some children in his class are disruptive and if there was a live lesson he thinks they would be a distraction to him if they were being noisy or messing around during the live lesson. As parents who are both working and have to leave the home to work at various times during the week (grandparents are helping with childcare and home schooling when we are working) the added pressure of needing to have [redacted] ready for a live lesson would be impossible for us and then [redacted] could miss out on learning. I also think that expecting teachers to do this in addition to everything else is not sustainable and I would be concerned about the impact on teacher's mental wellbeing that this additional work could bring. The whole school community is doing a fantastic job in these unprecedented times, a big thank to you all.
						Yes	Yes, very helpful	Virtual experience with classmates would be nice	You are doing a great job!
							These are great and have been very helpful.		
						Yes, I read out the feedback to her.	Yes, they have been fine	Possibly a virtual class assembly so that the kids	We thank you all for what you are providing!
